

To the intended rule makers.

I have lived and flown in Alaska for many years. This rule will make many companys go out of business. To make someone abide by these ludicrous rules is not safe in itself. To add another buricratic paperwork to our free american pilots that are showing many tree huggers the wonders of nature is stupid. You are proposing to put many people out of work in already finaancially stressed towns.

If this rule passes america has gone mad don't let this happen in our free country.
